

EDUCATION

University of Florida - Master of Science, **Computer Science**

May 2023

University of Mumbai - Bachelor of Engineering, in **Computer Engineering**

May 2017

Relevant Coursework - Distributed Systems, Cloud Computing, Software Engineering, Data Structures & Algorithms, Human-Computer Interaction

WORK EXPERIENCE

Remora | *Back End Developer* | *United States*

July 2023 - Dec 2025

- Designed and integrated ML/NLP-powered search and recommendation pipelines into Java-based backend services, improving query relevance and user engagement by 25%
- Architected and deployed scalable RESTful APIs and distributed systems using Java 17/21, Spring Boot, Hibernate, MySQL, and AWS Cloud infrastructure, improving system performance and reliability by 30%
- Built scalable microservices architecture with Spring Cloud and asynchronous programming patterns (RabbitMQ) to optimize cross device synchronization and data consistency.
- Developed asynchronous backend schedulers leveraging Spring Batch distributed architecture principles, ensuring 99.9% uptime for enterprise clients
- Collaborated cross-functionally with front-end, data science, and product teams to integrate ML-powered features and AI-driven workflows into production systems using Spring AI and microservice orchestration
- Mentored junior developers on best practices focusing on Spring Security, Test-Driven Development (JUnit/Mockito) for code quality

Sonos | *SDE Intern* | *United States*

June 2022 - August 2022

- Designed and implemented real-time distributed tracking systems using Spring Boot, Spring JPA, and ReactJS, improving event visibility across services by 90%
- Leveraged **asynchronous programming and schedulers** to optimize cross-device synchronization.
- Achieved 90% code coverage using TDD (JUnit, Mockito), strengthening system reliability and code quality for enterprise software solutions
- Contributed to building reusable platform components for IoT device management and cloud integration

Itiviti | *Full Stack Engineer* | *India*

October 2020 - July 2021

- Developed **Java microservices and REST APIs** using **AngularJS and proprietary backend frameworks**, improving data throughput by **20%**.
- Implemented search and information retrieval systems using MongoDB indexing and query optimization, reducing query latency by 7%.
- Built **log-scheduler pipelines** in **MongoDB**, improving query speed and operational efficiency by 7%.

QualityKiosk Technologies Private Limited | *Software Developer* | *India*

July 2019 – September 2020

- Designed **Spring Boot microservices** and integrated **ElasticSearch, MongoDB, and MySQL** for analytics dashboards.
- Automated repetitive backend workflows, reducing manual deployment time by **15%**.
- Developed **AngularJS analytical dashboards**, improving data visualization and operational reporting

Verdantis Tech Private Limited | *Software Developer* | *India*

July 2017 - June 2019

- Enhanced **SFTP and web service throughput by 300%** via **multithreaded Java (Spring)** architecture.
- Automated **database schema retrieval** and validation, reducing errors and improving data quality.
- Improved **SSO login compatibility** via UTF-8 support for global user authentication.

PROJECTS

Twitter Clone | **F# / REST APIs , Distributed Systems, Actor Model**

- Built a distributed social system using the Actor Model and REST APIs; verified fault tolerance through integration tests.

AI-Powered Search Platform | **Java, Elasticsearch, Spring Boot, ML/NLP**

- Built a distributed search and information retrieval system using Elasticsearch and Lucene-based indexing, integrating NLP techniques for semantic search and query understanding

Compiler | **Java, JUnit, NLP**

- Developed a lexer, compiler, Abstract Syntax Tree, Type Check Visitor, and Bytecode Generator using Java and test cases using JUnit . Applied NLP concepts for tokenization and semantic analysis.

Inventory Management | **Java, Microservices, REST, LRU Caching**

- Developed a fault-tolerant inventory system using microservices and node replication to improve latency and handle node failures.

P2P Distributed Architecture | **Java, AWS EC2**

- Deployed a multithreaded peer-to-peer system using RMI and AWS EC2 for high concurrency and reliable distributed processing.

SKILLS

Languages: Java, Python, PHP, JavaScript, TypeScript, SQL

Frameworks: Spring Boot, Spring JPA, Hibernate, Laravel, React, Node.js, Angular

Databases: MySQL, PostgreSQL, MongoDB, Cassandra

Cloud & DevOps: AWS (S3, SQS, Lambda), Docker, Kubernetes, Jenkins, Git, Nginx

Tools & Testing: JUnit, Mockito, Maven, Gradle, Redis, Elasticsearch

Concepts: Distributed Systems, Microservices, RESTful API Design, System Design, CI/CD, Agile
